	Examiner Name	LEFFERS JR., GERALD G.
	Title:	"METHODS FOR IDENTIFYING MODULATORS OF NF-KB ACTIVITY"

Dear Sirs:

Applicants wish to extend their gratitude to Examiner Leffers for the telephonic interview with the undersigned on December 21, 2004; the following summary is provided.

During the interview, the rejections of the claims 32 and 38 under §112, first paragraph were discussed. The amendments and arguments set out in the Amendment filed November 23, 2004 were also discussed. This Amendment was responsive to the Office Action mailed September 22, 2004.

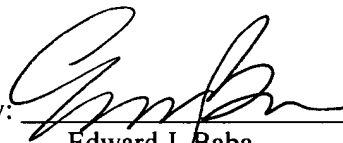

With respect to claim 38, arguments were reiterated that paragraph [0082] of the specification provides adequate support for the amendment reciting "anti-acetylated lysine antibody", as recited in the Amendment filed November 23, 2004. With respect to claim 32, further amendment of the claim to recite specific blocking agents such as leptomycin B or TSA was discussed.

Examiner Leffers kindly agreed to reconsider the arguments with respect to the "anti-acetylated lysine antibody" of claim 38 and further amendments to claim 32 in a supplemental After-Final response.

The Commissioner is hereby authorized to charge any underpayment of fees associated with this communication, including any necessary fees for extensions of time, or credit any overpayment to Deposit Account No. 50-0815, order number UCAL-234.

Respectfully submitted,
 BOZICEVIC, FIELD & FRANCIS LLP
